## INTRODUCTION

The National Library of Medicine (NLM) selects the journals to be indexed in *Index Medicus*® with the advice and guidance of the Literature Selection Technical Review Committee (LSTRC). The LSTRC is an NIH-chartered Advisory Committee composed of fifteen authorities such as physicians, researchers, educators, editors, health sciences librarians and historians knowledgeable in the field of biomedicine. At its three meetings during the year, the committee reviews new biomedical journals and examines the overall coverage of specific subject fields to ensure that *Index Medicus* provides access to important biomedical and health sciences journals published throughout the world.

The 3,799 journals being indexed for *Index Medicus* as of April 2002 are listed in four sections:

- (1) Alphabetic listing by abbreviated title, followed by full title;
- (2) Alphabetic listing by full title, followed by abbreviated title;
- (3) Alphabetic listing by subject field; and
- (4) Alphabetic listing by country of publication

In addition, there are three introductory sections which list titles that have been newly selected for indexing during the past year, and titles that are no longer indexed because they either ceased publication or were deselected as titles to be indexed for *Index Medicus*.

Updated information about titles newly selected for indexing, title changes, and titles no longer indexed is provided bimonthly as an electronic file “Updates for Indexed Titles.” Both the “Updates” list and the *List of Journals Indexed in Index Medicus* are available at <http://www.nlm.nih.gov/pubs/libprog.html>.

In addition, the July issue of *Index Medicus* contains a cumulative list of all serials that have been selected for indexing or that have changed title since the previous *List of Journals Indexed in Index Medicus* was published.

\*\*\*

The symbol “s)” is used before titles that are indexed selectively, i.e., indexed only for articles relating to the field of biomedicine. The symbol “\*” identifies titles indexed in *Abridged Index Medicus*, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM’s PubMed® database as a search subset limit called “Core clinical journals.”

## FILING ORDER

Entries in the title abbreviation and full title sections are sorted letter by letter. Numbers sort before letters. Special characters are ignored, except for the “&”, which sorts before numbers.

## ABBREVIATIONS OF TITLES

The title abbreviations appearing in the *List of Journals Indexed in Index Medicus* are constructed using the *List of Serial Title Word Abbreviations* (LSTWA). The LSTWA is maintained by the ISSN (International Standard Serial Number) International Centre. For more information about the Centre and its LSTWA, please consult the ISSN Web site at <http://www.issn.org>.

## DATES OF PUBLICATION

The dates of publication appear on the line below the title. These data contain the date of the first issue for titles currently published and the first and last dates for titles that have ceased publication or have been superseded or continued by another title. Unknown years are indicated with a “?”. The dates given are publication dates, and do not necessarily represent NLM’s holdings or issues indexed for *Index Medicus*. Information about NLM’s holdings and indexing coverage can be found in LOCATORplus, NLM’s online catalog, at <http://locatorplus.gov>.

## INTERNATIONAL STANDARD SERIAL NUMBER

The International Standard Serial Number (ISSN) is a serial identifier consisting of a unique seven-digit number and an eighth check digit. The ISSN uniquely identifies a serial title, regardless of language, and is therefore useful in international information exchange and in machine storage of serials data. The ISSN is assigned to a serial title by the appropriate national center of the ISSN Network, which is coordinated by the ISSN International Centre in Paris. The National Serials Data Program (NSDP) of the Library of Congress is the United States Center of the ISSN Network. The ISSN is irrevocably linked to the key title of the serial. If the title of a continuing serial changes, a new ISSN must be assigned to the new title. In the *List of Journals Indexed in Index Medicus*, the number, if known, is preceded by the abbreviation ISSN. More information about the ISSN is available at <http://www.issn.org>.

## NLM UNIQUE IDENTIFIER

The NLM unique identifier consists of either a number with up to nine digits or an eight-digit number followed by an alphabetic character. It is used by medical libraries in reporting serial holdings data to SERHOLD®, NLM's database of machine-readable holdings statements for serial titles held by U.S. and Canadian biomedical libraries. The unique identifier appears opposite the ISSN. In PubMed, this number is labeled as "JID" in the MEDLINE display format.

## PERMANENT PAPER NOTICE

Entries for indexed journals known to be printed on acid-free paper contain the designation 'ACID-FREE'. The ACID-FREE notice appears above the NLM unique identifier.

To report other *Index Medicus* journals printed on acid-free paper, contact: Head, Preservation and Collection Management Section, National Library of Medicine, 8600 Rockville Pike, Bethesda, MD 20894. To obtain information about permanent paper and how to indicate its use, see the latest edition of American National Standard ANSI/NISO Z39.48, "Permanence of Paper for Publications and Documents in Libraries and Archives" at <http://www.niso.org/>.

## SUBJECT HEADINGS

All subject headings used are from the most recent edition of NLM's controlled vocabulary, Medical Subject Headings (MeSH®). The appropriate medical specialty is used as a descriptor whenever possible rather than an organ or disease term. That is, DERMATOLOGY is used as a subject heading for JOURNAL of CUTANEOUS PATHOLOGY rather than SKIN or SKIN DISEASES. When a specific heading applies to only one or two titles, a more general heading is assigned.

\*\*\*

When requesting serial interlibrary loans from the National Library of Medicine, please include the NLM call number (or On Order or In Process notation) and the NLM unique identifier. The NLM call number, holdings information indicating what issues of a title NLM owns, and detailed bibliographic records can be found in LOCATORplus, NLM's online catalog, at <http://locatorplus.gov>.

Information about how to order this publication can be found at <http://www.nlm.nih.gov/pubs/pubcat.html>. Information about journal selection for *Index Medicus* can be found at <http://www.nlm.nih.gov/pubs/factsheets/jsel.html>. Questions can also be directed to NLM's Customer Service Desk at [custserv@nlm.nih.gov](mailto:custserv@nlm.nih.gov) (1-888-356-3656).

## GEOGRAPHIC LISTING

*The country indicated for each publication represents the country of the current publisher. This means that in some instances the geographic affiliation of a title may not be represented by the place of publication, e.g., the journal of a Japanese association might be published in the Netherlands.*

*The symbol "s" identifies titles which are selectively indexed. Only articles relating to the field of biomedicine are indexed from these journals. The symbol "\*" identifies titles indexed in Abridged Index Medicus, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM's PubMed® database as a search subset limit called "Core clinical journals."*
